AI

CHAT GPT

ChatGPT is a modern chatbot from OpenAI that uses AI to conduct dialogues, generate texts and assist in programming.

Today the biggest competitor of chat gpt is Google Bard

GOOGLE BARD

Google Bard is a chatbot and text generation system developed by Google.

Bard is designed to help you find information, answer questions, generate text, and even get creative. It can serve as a tool for quick access to knowledge and ideas.

DEEPL

One of the best translation services that uses neural networks for high-quality text translation.

In addition to translating plain text, the service allows you to translate entire documents (for example, Word or PowerPoint files) while preserving the original formatting.

DALL-E

CREATES IMAGES BASED ON TEXT DESCRIPTION

THIS MODEL DEMONSTRATES HOW AI TECHNOLOGIES CAN EXPAND THE BOUNDARIES OF CREATIVITY AND HELP REALIZE IDEAS THAT WERE PREVIOUSLY THOUGHT IMPOSSIBLE.

GitHub Copilot

A programming assistant that helps you write and improve code by integrating with popular development environments.

The model is trained on a large amount of open source code, which allows it to generate relevant and useful tips.
